Homework 1

Introduction

This is a LaTeX template designed for writing ~~endless~~ assignments in SUSTech. The design style is inspired by Henry's work[1].

Usage

1. Download `SUSTechHomework.cls`, and place it in the same directory with your LaTeX document;

2. Set the `documentclass` to SUSTechHomework.

Example

```
1  \documentclass[onecolumn,oneside]{SUSTechHomework}
2
3  \author{Name}
4  \sid{11110000}
5  \title{Homework 1}
6  \coursecode{CS101}
7  \coursename{Introduction to Computer Science}
8
9  \begin{document}
10   \maketitle
11
12   \section{Introduction}
13
14   Hello World!
15
16 \end{document}
```

Tips

- Currently you need to compile your document with XꓱLaTeX;

- You may enjoy using Overleaf[2], Papeeria[3], or other online LaTeX writing systems.
